

Profiles and Features

The EDMM setup offers two profiles:

TWR_PHX

The profile to use when staffing positions up to TWR. There are two variants available: **TWR_PHX_DAY** (black-on-white) and **TWR_PHX_NIGHT** (white-on-black). It represents our take on the surface movement and surveillance radar displays the real-life PHOENIX suite offers.

iCAS2

Our radar profile for all arrival and center positions, named after the real-life iCAS2 system we are visually trying to replicate. Only a black-on-white variant is available, as with its real-world counterpart.

Sector Lines

Reference	Rendering	Description	Example
1	solid line	Lower ACC boundary	Border EDMMWLD-EDGGDKB

Reference	Rendering	Description	Example
2	medium dashes	TMA boundary	Border DMNH-DMSH
3	dots	Release lines	Release line EDMM/LOWS/LOWI
4	spaced dots	Political borders	Border Germany-Austria
5	long dashes	Upper ACC boundary	Border EDUUDON-EDUUCHI
6	dash-dotted	Area of common interest	ARBAX window, PILAM area
