

Overview

Büchel is a Bundeswehr base in Büchel. The airfield was originally built by the French Army but transferred to Germany shortly after its completion. Today, the airport serves as a base for the Taktische Luftwaffengeschwader 33, although all of its aircraft are currently stationed at Nörvenich air base while Büchel's runway is undergoing construction work; once this construction work is completed, the Luftwaffe plans to station new F-35 fighter jets here as part of NATO's nuclear sharing concept.

As Büchel is a military airport, charts can't be found in the normal AIP. They are accessible through the MIL AIP, GEMIL FLIP VAD, and CENOR FLIP in the [milais](#).

Büchel is an unrestricted airport. The Tower position can be staffed by all controllers with an **S2** rating or higher. The radar position can be staffed by all controllers with an **S3** rating or higher. Additionally, controllers should closely familiarize themselves with military procedures before staffing the airport.

Büchel's runway is currently **closed IRL** due to construction work on the runway. Due to this, the **parallel taxiway is used as a substitute runway** for VFR only; departing and arriving traffic has to pick up/cancel IFR after departure/before landing.

Büchel ATC Stations

| Station | Station ID | Login | Frequency | Remarks | Endorsement |
|----------------|------------|----------|-----------|------------------|-------------------------|
| Tower | TSBT | ETSB_TWR | 131.460 | military station | unrestricted: no course |
| Arrival | TSBA | ETSB_APP | 130.155 | military station | unrestricted: no course |
